

Braille **XC10.0-500** Motorsport Lithium Battery

At only 1.8 KG, the XC10.0-500 Motorsport Lithium Battery is a high-performance upgrade from a traditional lead acid battery. Offering significant weight reduction, more power output and lasting up to 5 times longer than lead acid batteries!

BENEFITS:

- Superior starting capabilities with high cranking amp output per kg
- Fast and efficient recharge, up to 5 times faster than lead acid batteries
- Can be used in "Total Loss" (no alternator) applications
- 3-5 times longer service life vs lead-acid batteries
- Engineered for high shock and vibration applications
- Up to 2/3 weight reduction for equivalent cranking performance

PRODUCT INFORMATION

+ Physical Specs

Battery Chemistry	LFP
Length (mm)	150
Width (mm)	88
Height (mm)	145
Weight (kg)	1.8
Terminal Type	Brass terminal block with M6 bolt
Polarity	Left +

+ Technical Specs

5 Second Pulse Cranking Amps	575	Charging Temperature	0C to 50C
10 Second Pulse Discharge Current (A)	500	Discharge Temperature Range	-20C to +60C
Voltage	12	Storage Temperature	-20C to +60C
Capacity (Ah)	10.0		
Capacity (Wh)	128		
Continuous Discharge Current (A)	200		

+ Charging

Recharge Voltage	14.4V - 14.6V
Maintenance Charge Voltage	13.8V

Rev 05-23
